

Matrix 360/6

OVERVIEW

The YES-EU Matrix 360/6 is a highly flexible DC charging system expertly engineered to serve multiple parking bays efficiently. Acting as a smart power hub, it distributes massive energy capacity, ensuring your growing fleet is charged rapidly without overburdening your facility's local grid connection.

SPECIFICATIONS

Power	Connectors
360 kW per base unit, linkable to 1,080 kW	CCS2 · CCS High Speed · GB/T
Max output current	Interface
500 A	7-12" touchscreen · RFID
Output voltage range	Communication
150-1000 Vdc (800 V-ready)	4G · Ethernet
Supply voltage	Smart control
400 Vac	OCPP 1.6J dynamic distribution
Max input current	Operating temp
533 A	-20 degC to +50 degC
Charging standard	Protection
IEC 61851-1 / -23	IP54
Charging points	Dimensions (WxDxH)
2 to 6 terminals	1000 x 800 x 2100 mm
Per-terminal	Weight
300 kW CCS High Speed	650 kg
